

A NEW AIR. A BETTER AIR

# UTO Mini Pro Air Purifier

UTO Mini Pro is an oxidative treatment unit designed to purify indoor air, especially crafted for installation in ductless air systems, mini-splits (wall, ceiling, or cassette), and fan coils.

It utilizes cutting-edge photocatalytic technology that activates a TiO2 catalyst through broad-spectrum UV radiation. This generates natural oxidants that enable the degradation of volatile organic compounds (VOCs) and the inactivation of microorganisms such as viruses, bacteria, yeasts, and molds, up to **99.99%**.
